Finance nerd and tech professional

SAM CONNELLY

HERE TO HELP YOUR TEAMS BUILD QUALITY SOFTWARE

Studying financial advice. Superannuation is my specialty. My experience spans 5 years in finance, 7 years customer service and 10 years in tech.

Communication skills; I've presented at 20 tech conferences, maintain a blog, a YouTube channel and answer finance questions on reddit.

Technical background; I can build backend servers, mobile apps, database scripts and automation. I've worked on a wide variety of technologies.

Analytical skills; I've helped teams develop test strategies, analysed code coverage and created dashboards into customer insights. I enjoy diving into data

CAREER HIGHLIGHTS

MAY 2022 - SEP 2022

Lead Test Engineer, Entsia (perm, insurance)

[Presentation: Meh to Awesome pipelines](#)

Lead testing for an insurance backend platform; coached and mentored software engineers in better quality engineering practices, built out regression testing frameworks and improved integration test coverage.

Did not pass probation due to a skills mismatch

Tech: Java, AWS, Jenkins, DataDog, Postgres, Oracle

MAY 2019 - APR 2021

Senior Test Engineer (Mobile), Commonwealth bank of Aus (perm, superannuation)

Lead testing for an investment mobile app; built analytics dashboards to provide key business insights, provided competitor analyst insights, participated in code reviews

Ran retrospectives, facilitated standups and ran bug backlog grooming sessions. Scrum Agile.

Tech: Swift (XCTest), Kotlin (Espresso), Appium, C#, Postman, TeamCity and SQL

DEC 2016 - DEC 2017

Test Analyst, Google (contracter)

[Presentation: Tails of Fail](#)

Worked on google maps - triaged bugs and investigated high impact customer issues.

Audited and maintained an android device farm. Had to deep dive into battery historian and android command line tools to compare battery usage for a new feature. Used python scripts to validate government public transport data

DEC 2014 - NOV 2016

Test Engineer, Tyro Payments (perm, banking)

Tester in Agile (Extreme Programming) iOS team. Lead performance testing initiatives, assisted product with SQL/Tableau reports and managed integrated test environments.

Tech: Swift (XCUITest), Java, JMeter, VMWare, Jenkins and PACT Contract Testing

NOTE: These are my career highlights. In the gaps I was doing short term contracting with Big W, Challenger and a bunch of smaller companies. My full work history is available on LinkedIn

LEAD TEST ENGINEER PORTFOLIO

frankieone

NOV 2021 - MAR 2022

INTERIM QA MANAGER

(CONTRACT)

K6, GO

Backfilled role. FrankieOne do identity verification and fraud prevention for digital products.

I built a k6 performance script and mentored engineers in how to maintain it. Hired and coached a team of 5 software testers on performance testing and other aspects of quality.

MAY 2021 - NOV 2021

TEST ENGINEER (CONTRACT)

TYPESCRIPT, JEST, SUPER TEST

KOTLIN, AZURE

RETAIL

[Blog: Performance Testing APIs](#)

[Blog: Using SuperTest with APIs](#)

Digital transformation project, porting real time stock information to a microservice cloud based architecture. Rejected and oversold stock was an average \$550K per week problem.

Built a performance testing framework that integrated with azure event hub, built monitoring dashboards in azure and created a script to help maintain test environment data.

MAY 2019 - APR 2021

SENIOR MOBILE TEST ENGINEER

SWIFT, KOTLIN, C#

INVESTMENT, FINANCE,

SUPERANNAUTION

CommBank (4+)
Commonwealth Bank of Australia
Designed for iPhone
#1 in Finance
★★★★★ 4.8 • 107.9K Ratings
Free

[Presentation: Mobile app test strategy](#)

[Blog: Metrics and quality](#)

Maintained an API mocking framework for both android and iOS that was used for testing, marketing and support. Worked on the app from inception -> internal beta release -> app store release. Drove quality from the ground up.

Built a UI snapshot test framework on iOS and appium tests for both android/iOS with C#. Used metrics (adobe analytics) to monitor for customer issues (like expired SSL certs).

DEC 2014 - NOV 2016

TEST ENGINEER

JMETER, OBJECTIVE C, JAVA

BANKING, BUSINESS, PAYMENTS

Tyro (4+)
Tyro Payments
#182 in Finance
★★★★★ 4.8 • 3.7K Ratings
Free

[Presentation: Using robots for testing](#)

[Blog: Risk based heuristic for mobile automation](#)

Maintained our integration test environment, it's data and usage. Collaborated with engineers on test strategy and day to day pair testing activities. Ran an engineering wide bug bash before we went live with our banking licence.

Saw the test team grow from 5 people to 20+. Was the second test engineer to be completely embed in a dev team and coach and mentored all of the new starters with getting up to speed.

VOLUNTEERING

Lead the Sydney Testers meetup group for 4 years

Started the robogals UTas chapter in Tasmania while at uni

EDUCATION & TRAINING

- Graduate Diploma in Financial Advice (TAFE NSW, 2020 - 2022)
- Bachelor of Computer Science/Mathematics/Engineering (UTAS)
- Certified tech professional with ACS (member since 2012)
